

Iman Kassim (she/her)

Based in Birmingham, UK

tel: 07946798164 | email: iman.n.s.kassim@gmail.com

Professional Profile

- I am a self-motivated, skilled and hard-working data professional, who enjoys problem-solving and learning new things. I have over 7 years' experience working in data science, analytics, and service delivery.
- I am proficient in Excel (and VBA), SQL, Python, as well as CI/CD processes (Terraform/Jenkins), as well as PowerBI and Tableau.
- I enjoy and regularly practice self-learning, always improving my skills further – and I enjoy being challenged to learn something new and complete projects that may be new to me.

Career Summary

Technology Consultant - Data and AI Operations | Openreach

September 2023 – Current

I have worked within the DAIO team and the Network Introduction and Reliability team, focusing on using data to improve workplace processes and reduce spending. My role consists of analysing data and investigating processes and implementing new strategies and software (applications/ machine learning models) to assist.

Key Achievements

- Creating various ML models in Python for network predictive purposes, such as to help predict performance of the headends to identify key areas of risk and performance of the exchanges
- Savings for the company on average £1.5m a year in SLG payments due to improved processes and applications I created to more accurately estimate engineering jobs to reduce complaints.
- Undertaking courses in Google Cloud platform, Linux and ITIL4.
- Taking up the co-ordinator role within the Ethnic Diversity Network to support in the delivery of events and communications with the D&I team, as well as creating a kanban-style issue tracking platform for organisation within the team. I am also a team member within Gradnet, working to raise funds for Unicef.

Technology Consultant | QA Ltd

April 2022 – June 2023

During this time, I worked with many internal and external clients, such as HMRC, on specific data science and software development solutions. Throughout this career I have focused on working within different domains to widen my skillset, working with data analysis of systems, data architecture, building and repairing applications, routing, security, and DevOPS pipelines.

Key Achievements

- Supported building the data architecture system for a client, including pipeline configuration to support continuous integration.
- Working with stakeholders to create bespoke solutions for a range of issues, such as predicting failures, configuring new sites securely, creating dashboards, amongst others – as well as communicating with many different clients clearly about the solutions

Software Developer Degree Apprentice | BMW Group

August 2018 – October 2021

During this time, I have worked within many IT and business departments with a focus on data analytics. My routine responsibility usually consists of investigating and advising on the feasibility of solutions, as well as ideas to reduce error, or increase value – as well as communicating these findings to stakeholders. I rapidly advanced my skills, especially those in programming (Python, SQL, VBA etc), as well as achieving a First class BSC in Digital and Technology Solutions (Software Development).

Key Achievements

- Created 2 organisation-based applications for the company, as well as many other solutions used within BMW UK as well as in both Germany and Rosslyn (South Africa). Worked to maintain systems across the business within different areas, such as networking and infrastructure.
- Translated complex problems and solutions to inform those of changes in other parts of the business.

Frontend Website Development | Barganero / Erasmus+

March 2018 – April 2018

Working with Erasmus+, I spent two months in Cordoba, Spain developing the frontend of a new digital consulting company. Responsibility included creating UX/UI designs, React JS programming, SAP integration, and communicating with the shareholders regularly, amongst others. You can check out the website here - <https://bargaw.es/>

Volunteer Trainer | Untapped Innovation

April 2019 - Current

I have worked with Untapped Innovation, a charity that works to help young women into STEM careers. During my time with them, I have hosted workshops for young people, both technical and non-technical (building up confidence working with technologies), written articles, and completed a podcast with young girls aged 13-16 where I answered their questions about work in tech and the journey to get there.

Bartender | Hollywood Bowl PLC

September 2018 - May 2019

Qualifications

BSc Digital and Technology Solutions (Software development) | BMW Group and University of Bedfordshire

October 2021

- ◇ Grades – First class degree

Technical Courses

- ◇ Linux Fundamentals – QA (2024)
- ◇ ITIL4 Foundation – QA (2023)
- ◇ Deep Learning with PyTorch – Jovian.ml (July 2020)
- ◇ Interconnecting Cisco Networking Devices ICND1 (Feb 2020)
- ◇ Splunk Fundamentals 1 and 2 (Sept 2018)
- ◇ Prince2 (2018)

Hobbies & Interests

Apart from enjoy socialising and baking with friends, skateboarding, and playing guitar, I also spend time volunteering to support young people wanting to enter STEM careers.
